

The revolution for your network cabinet

The path to a secure and worry-free IT infrastructure.

patchbox.com

The Most Important Advantages for Customers and Users

Revolutionary Efficiency in Maintenance and Operation

With patchbox.one, maintenance is up to 8x faster. Installations, relocations and updates are easy and save your IT team resources.

Fast ROI and Sustainable Cost Savings

Whether initial installation or maintenance – patchbox.one offers immediate cost advantages and ensures long-term savings in operation and maintenance.

IT security: The Path to Secure IT

Clean, standardized network cabinets not only increase overall IT availability, but also help your company meet essential security standards.

Maximum Reliability and Organization

The intuitive cable management system patchbox.one reduces errors, prevents disconnections and ensures long-term stability and overview.

Flexibility and Seamless Scalability

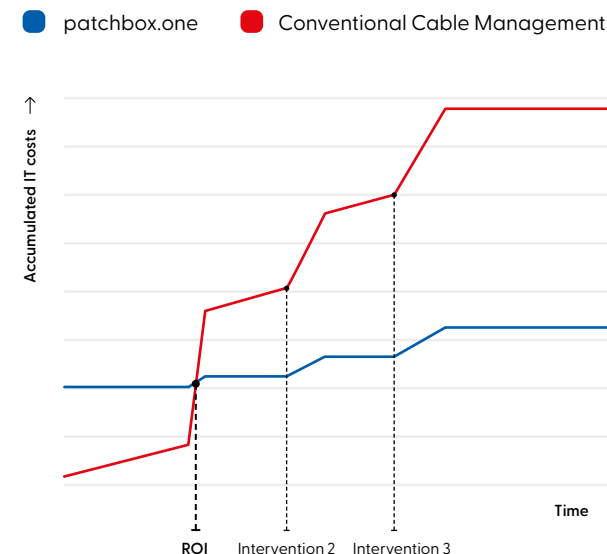

Whether a small installation or a large network – the easy expandability and user-friendly operation ensure future-proof solutions.

„The patchbox.one Is Quite Expensive Compared to the Cable..“

The “Most Popular” Objection Simply Explained...

The investment in the patchbox.one pays for itself after the first installment in the network cabinet by the IT team. The reason for this is the eliminated cable chaos and the drastic increase in efficiency with every move in the rack.

Success Stories: Inspiring Milestones of Our Customers

Patchbox is already deployed in various sectors, including critical infrastructure (military, hospitals, government), data centers, technology, manufacturing, oil and energy, and retail/fast food.

This Solution Is More Than Just a Cable

The main differences between conventional cable management and patchbox.one.

Without patchbox.one

Cable Chaos: loose cables often lead to cluttered server cabinets.

Time-Consuming: Maintenance and troubleshooting can take up to several hours.

Inflexible: New cables often mean more chaos and additional work.

Costly: Higher costs due to longer working hours and potential errors.

With patchbox.one

Clean and Organized: All cables are integrated into one system, ensuring order and clarity

Time-Saving: Maintenance and troubleshooting take up to 8 times less time.

Easy Scalability: The system can be easily expanded.

Cost Saving: Higher efficiency and reduced downtime save resources

These Tools Make the Life of Every IT Technician Easier

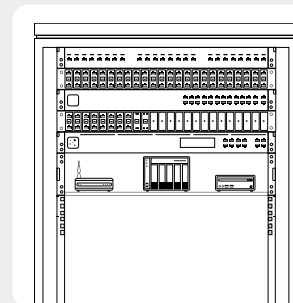

Setup.exe

The Setup.exe enables a single technician to do the work of two, holds your equipment, frees your hands, and fits your workspace. No tools required

/dev/mount

The tool-less, cage nut alternative for faster, easier network installations and maintenance. Reduce repetitive tasks and streamline your day-to-day operations

Rack-Planner

Plan your network cabinets with the rack planner and ensure seamless IT documentation.

Who is patchbox.one for?

IT decision-makers or admins who are responsible for the availability of their business processes and...

- regularly deal with IT certifications and standards (such as NIS2, ISO)
- have not yet found a solution to meet the minimum requirements for IT security
- want to save their organization time and money now and in the future with a fail-safe IT system
- want to prevent their own infrastructure from becoming a business risk
- regularly struggle with the (cable) chaos in their mission-critical IT infrastructure
- long for a "forever organized rack"
- no longer want to be afraid of downtime or astronomical maintenance costs
