

The background of the entire page is a technical drawing of a PCB layout, rendered in white lines on a black background. It shows various components like integrated circuits, capacitors, and connectors, along with a dense grid of pads and traces. The drawing is oriented diagonally, creating a sense of depth and technical precision.

PATCHBOX

Tech Specs

patchbox.one / 8RU / Cat.6a

PATCHBOX® is the most innovative cabling system for network racks ever. The patchbox.one / 8RU with Cat.6a cables consists of a Frame, the Patchcatch – our 0RU cable manager – and 24 Cable Cassettes with retractable flat cables inside. The cables are 0.8m long and cover up to 8RU - ideal for small wall cabinets. You can decide between UTP and STP shielding and eight different cable colours for better overview.

patchbox.one / Frame

To build your own patchbox.one, you first need a Frame. It offers space for 24 Cable Cassettes, which can be easily replaced within seconds. You can choose from a range of cable types, cable colors, and connector types. The Frame is easily and quickly mounted and can be filled with different Cable Cassettes or Blind Panels to cover any unoccupied slots, making it completely modular.

/dev/mount

The /dev/mount is the fastest solution replacing conventional cage nuts used in server and network racks. Its faster mounting capabilities increases productivity of mounting 19" equipment. The /dev/mount holds equipment securely in place before the nuts are fastened, making hardware mounting a faster and more secure task.

Items included

50x /dev/mount

100x dual-sided / reversible hex nuts

Patchcatch Solo

The Patchcatch Solo is ORU Cable Management Tool that fastens your device while at the same time managing your cables. One 24-Pack replaces 48 conventional cage nut screws as well as 12 cable managers, therefore allowing you to use up to 50% more rack space. Ideal for server cabinets with limited space around the rails, the Patchcatch Solo enables you to manage your cables on the front sides of the rack without wasting a rack unit. The Patchcatch Solo is compatible with conventional M6 cage nuts, the PATCHBOX /dev/mount, and the Mounting Rails of the patchbox.one. One 24-pack of Patchcatch Solo allows you to manage cables and fasten hardware of 12 rack units.
